The Business Value of HighByte Intelligence Hub

IDC's study demonstrates how organizations' use of HighByte Intelligence Hub can drive improvements in operational efficiency, scalability, and digital transformation across manufacturing and industrial environments. The Intelligence Hub helps unify and contextualize data from disparate sources, enabling real-time visibility, predictive maintenance, and scalable integration across sites, systems, and teams.

KEY RESULTS

339% faster to complete a new project

8-month payback on investment

448% three-year return on investment

CUSTOMER QUOTE:

"We're rolling out a new OEE (Overall Equipment Effectiveness) system at one of our locations with automated data inputs, reducing operator workload. Thanks to HighByte, we deployed it across 20 lines in just one week — something that would've taken over a week per line without it."

BUSINESS IMPACT

▶ **$8.7 million** additional annual revenue

▶ **$1.9 million** equipment-related annual savings

▶ **53%** faster to resolve unplanned downtime

CUSTOMER QUOTE:

"HighByte allows us to build once and scale across sites and business units. Standardizing and contextualizing data is essential when trying to deliver consistent KPIs across dozens of plants with different systems and practices. Without it, scaling would be nearly impossible."

DATA-DRIVEN BENEFITS

▶ **63%** more efficient IT teams working on data-oriented initiatives

▶ **25%** more efficient floor manufacturing teams

▶ **35%** decrease in average number of quality issues

▶ **315%** increased data throughput

▶ **60%** more employees with access to analytics capabilities
